EDUCATION

University of California Santa Barbara

Expected Jun 2026

Bachelor of Science (B.S.) in Mechanical Engineering - GPA 3.9

- Dean's Honors: Every Quarter

PROFESSIONAL EXPERIENCE

Powertrain Manufacturing Engineering Intern

May 2024 – Sep 2024

Joby Aviation

- Designed a tool for filling a component with potting compound in SolidWorks, ran sub-scale tests using 3D-printed prototypes to validate fill level and dispersion, wrote MWI, and trained technicians
- Administered a weld fatigue characterization study to set a minimum requirement for the number of spiral welds, ran representative samples on an Instron, and presented data to design engineers, decreasing reworks by 12%
- Overhauled a production thermal fluid test stand, optimizing the fluid system to collect more accurate data and be easier to operate, created finite state machine diagrams in Lucidchart and layout in SolidWorks
- Designed multiple production tools in SolidWorks and created drawings of all components with GD&T

Mechanical Engineering Intern

Jun 2023 – Jan 2024

Healthy Tech LLC.

- Designed a consumer biomedical electronics product for mass production using Fusion 360, following injection molding manufacturing guidelines, doing material selection, and injection molding simulations.
- Developed a Low-Energy Bluetooth application in C on the Zephyr RTOS for an nRF SoC and programmed I^2C and SPI drivers to collect and broadcast temperature sensor data and run LEDs

Undergraduate Lab Assistant

Jun 2023 – Present

California NanoSystems Institute – CNSI

- Identified several failure points in a Silane deposition tool and re-designed the tool to be safer and easier to operate in SolidWorks; manufactured, tested, and wrote the SOP, greatly decreasing maintenance time by 75%
- Led a team of 3 to develop, prototype, and manufacture a precision wind tunnel fixture frame and tensioning mechanism for a lab, allowing more precise alignment and decreasing experiment setup time by 80%
- Coordinated, designed, and fabricated more than 65 precision laboratory parts in accordance with researcher requirements using laboratory tools: CNC, 3D-printing (FDM, SLA), Lasercutter, Lathe, Bandsaw, etc.

Undergraduate Research Assistant

Sep 2022 – Jun 2023

Hansma Lab

- Designed a 3D-printed handheld case in SolidWorks to repackage a tabletop biofeedback device, which allowed subjects to take the devices home to collect 15x more data instead of visiting the lab
- Developed a low-energy Bluetooth circuit in KiCad, replacing the original device electronics, reducing quiescent power draw by 99%, assembly time by 90%, and cost by 30%
- Evaluated and coordinated the use of injection molding to manufacture the device cases, designed injection molds in Onshape to be SLA 3D-Printed, and produced >45 units 95% faster and 60% cheaper

EXPERIENCE

Aerodynamics Team Member

Sep 2022 - Present

UCSB Formula Society of Automotive Engineers – FSAE

SKILLS

Software: SolidWorks, Fusion 360 CAD & CAM, Matlab, Ansys, KiCad, Onshape, Blender, Catia 3DX, Excel

Mechanical: Manual/CNC Mill, Lathe, 3D Printing, Laser Cutting, Band-saw, Hand tools, Water-Jet
